After filling out page one of this document, please save it to your computer and email a copy to the above email address. A technician will respond within 2 business days with page 2 completed and information on how to proceed with having your Airsoft equipment serviced.

Description of Problem, Upgrades Needed, Or Upgrade Package Requested: (Please be as specific as you can when describing problems)

Please make sure to include your battery and magazine with your gun. Guns shipped without batteries and magazines may not be able to be fully tested, and any work done to them might not carry any warranty. Please ship all items in durable PLAIN boxes. DO NOT ship any guns in packages that might depict the contents of the package in a visible manner. Often the original box your gun was purchased in works well if turned inside out (plain side out). Please use a reliable carrier for shipping your gun to us. FedEx and UPS offer better tracking and insurance than US Postal Services. Infected Armory will accept packages shipped via FedEx, UPS, US Postal Services, and DHL. We will ship your equipment back to you in the same packaging you used when shipping to us. Please NO PACKING PEANUTS. We suggest using packing / shipping paper, solid foam, or bubble wrap. Shipping address will appear on the next page after you receive your quotation and technician recommendations.
